

Trays 19 "rack Fiber Optic

Product Description

Tray 19 "1HU black color for the distribution of optical fiber. Has a guide for sliding allowing easy access and manipulation within.

Available for the installation of any type of ST adapters, SC, LC or FC both simplex and duplex capabilities and 12, 24 or 48 adapters.

The back has two openings for cable entry, this being subject to the tray with two plastic cable ties.

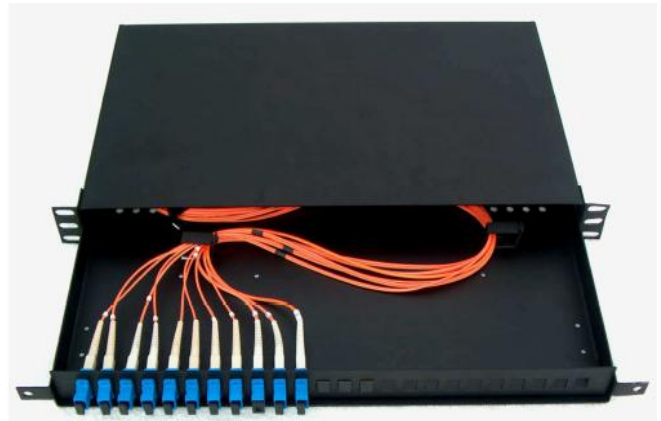

Includes the provision of rings organizer for a correct arrangement of fiber optic cables.

The installation of plastic caps for holes blindly go where no adapters avoids any entry of dust into the tray, while maintaining the aesthetics of the installation.

The front panel has three positions to choose, depending on the depth where want to install. The deepest features a full protection of fittings and hoses patch against unwanted accidents.

For other configurations and measures call our sales department.
