

Metal plug

Product Description

Metal plug for fastening medium loads with bolts or threaded rods. Optimum solution for serial fastenings in ceiling's and concrete. The anchor can be used where fire resistance is required. For correct setting, the TOOL-2 is required.

Features/Benefits

- for accurate setting flush with the surface, independent of hole depth
- easy setting with TOOL-2
- no thread damage when hammering the anchor into the hole
- visual verification, a mark on the flared end, done by the hand setting tool, indicates a proper expansion ;

Technical Specifications

Product Line	Radiating Cable Accessories
Product Type	Installation Hardware
Installation Hardware Type	Metal Plug
Transmission Line Type	Radiating Cables (all sizes)
Material	Stainless Steel (A4)
Thread	M8
Length, mm (in)	30 (1.181)
Drill Hole Depth, mm (in)	32 (1.26)
Drill Hole Size, mm (in)	10 (0.39)
Package Quantity	1
