

## 1-5/8" RADIAFLEX® RLK Cable, A-series

**Product Description**

RADIAFLEX® functions as a distributed antenna to provide communications in tunnels, mines and large building complexes and is the solution for any application in confined areas.

Slots in the copper outer conductor allow a controlled portion of the internal RF energy to be radiated into the surrounding environment. Conversely, a signal transmitted near the cable will couple into the slots and be carried along the cable length.

RADIAFLEX® is used for both one-way and two-way communication systems and because of its broadband capability, a single radiating cable can handle multiple communication systems simultaneously.

This RADIAFLEX® radiating cable utilize a low-loss cellular polyethylene foam dielectric and a smooth copper outer conductor which offers a superior electrical performance together with good bending properties.

**Features/Benefits**

- Broadband from 30 MHz to 980 MHz
- For applications in tunnels and buildings
- Low coupling loss variations

**Technical Specifications**

Size:	[ in ]	1-5/8"
Max. operating frequency:	[MHz]	980
Cable Type:		RLK
Jacket		JFN: halogen free, non corrosive, flame and fire retardant, low smoke, polyolefin Test methods for fire behaviour of cable : IEC 60754-1/-2 smoke emission: halogen free, non corrosive IEC 61034 low smoke IEC 60332-1 flame retardant IEC 60332-3-24 fire retardant
Slot Design		Groups of vertical slots at short intervals
Previous Model Number		
Impedance	[Ω]	50 +/-2
Relative propagation velocity	[%]	89
Capacitance	[pF/m (pF/ft)]	76 (23.2)
Inductance	[μH/m (μH/ft)]	0.190 (0.058)
DC-resistance inner conductor	[Ω/km (Ω/1000ft)]	1.30 (0.40)
DC-resistance outer conductor	[Ω/km (Ω/1000ft)]	1.30 (0.40)
Outer Conductor Material		Overlapping Copper Foil
Inner Conductor Material		Corrugated Copper Tube
Diameter over Jacket	[mm (in)]	48.2 (1.90)
Diameter Outer Conductor	[mm (in)]	44.2 (1.74)
Diameter Inner Conductor	[mm (in)]	17.6 (0.69)
Minimum Bending Radius, Single Bend	[mm (in)]	700 (28.0)
Cable Weight	[kg/m (lb/ft)]	1.10 (0.74)
Max. tensile force	[N (lb)]	1200 (270)
Indication of Slot Alignment		Guides opposite to slots
Storage temperature	[°C (°F)]	-70 to +85 (-94 to +185)
Installation temperature	[°C (°F)]	-25 to +60 (-13 to +140)
Operation temperature	[°C (°F)]	-40 to +85 (-40 to +185)
Stop bands	[MHz]	300-375, 660-750
Recommended / maximum clamp spacing	[m (ft)]	1.5 (5)
Minimum Distance to Wall	[mm (in)]	80 (3.15)
Length	[m (ft)]	

**Notes**

- Coupling loss as well as longitudinal attenuation of RADIAFLEX® cables are measured by the free space method according to IEC 61196-4.
- Coupling loss values are measured with a radial (below 330 MHz) or parallel (above 330 MHz) orientated dipole antenna.
- The coupling loss values given in brackets are average values of all three spatial orientations (radial, parallel and orthogonal) of dipole antenna.
- Coupling loss values are given with a tolerance of ±10 dB and longitudinal loss values with a tolerance of ±5%.
- In case of a conflict of operational and stop band, please contact RFS for further assistance.
- As with any radiating cable, the performance in building or tunnel environments may deviate from figures based on free space method.
